Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, 110, 112, and 114-116, drawn to a method for obtaining at least one calibration filter for a Mass Spectrometry (MS) instrument system, classified in class 702, subclass 85.
 - II. Claims 28-52, 111, and 113, drawn to a method for analyzing peaks corresponding to data obtained from an instrument system used for performing at least one of separation and analysis of analytes, classified in class 250, subclass 282.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility such as the method for obtaining at least one calibration filter for a Mass Spectrometry (MS) instrument system of group I does not require step of reporting regression coefficients as one of integrated peak areas and peak position deviations of group II and the method for analyzing peaks corresponding to data obtained from an instrument system used for performing at least one of separation and analysis of analytes of group II does not require steps of obtaining, for a given calibration ion with its isotopes, measured isotope peak cluster data in a mass spectral range; calculating, for the given calibration ion with its isotopes of group I. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
